Minnesota Highway Workers...

Give 'em a BRAKE

June 25, 1992

Re: Johnson Brothers Corporation

TO WHOM IT MAY CONCERN:

Johnson Brothers Corporation has been constructing highway projects for the Minnesota Department of Transportation from 1959 to the present. They have bid and successfully completed major bridge construction, bridge repair and reconstruction, grading and pavement projects.

The value of their major construction projects has been in the range of 13 to 30 million dollars.

The quality of their work and cooperation during the project has been excellent. They have demonstrated an ability to adequately supervise and staff their project to accomplish the work on time and in accordance with the contract.

Sincerely,

A large, handwritten signature in cursive that reads "Paul M. Bergman".

Paul M. Bergman  
Contract Administration Engineer
