Leg III E-Slip Development
(Phase I of SPN 578-29-00090
Steel Sheet Piling Bulkhead and Mooring Bits, Part I
Greater Lafourche Port Commission

Gentlemen,

In reference to the above project we would like to commend the job done by Mr. Bruce Duhon and Mr. Al Draeger. These two individuals were very pleasant to work with and were very knowledgeable about the project. The bulkhead they built is by far the best looking bulkhead in the port to date. The fact that a project of this size is constructed without any extra cost says a lot about Mr. Duhon's and Mr. Draeger's dedication to your companies reputation and their loyalty to the customer.

Thanks for a job well done!

Sincerely,

Joseph C. Picciola, II
Vice President
